

Lock-off Solenoid Filters IMPCO AUTOMOTIVE Vehicle Systems

There are two different electronic lock-off solenoids used with IMPCO AUTOMOTIVE vehicle systems. One has a **red** electronic solenoid and a relatively large fastener below the filter enclosure; the other has a **black** electronic solenoid and a low-profile fastener below the filter enclosure.

The system manufacturer recommends that you replace the filter for the above lock-offs every 15,000 miles or at least once per year. It is important that you use the correct replacement filter. Below noted are the correct part numbers of each filter repair kit.

Part Number:	o4RE00100005
Description:	Filter Kit, LPG Lock-off
Price (each):	\$19.73

Part Number:	RK-ET98
Description:	Filter Kit, LPG, ET-98 Lock-off with Filter
Price (each):	\$24.37
